EDUCATION

University of Chicago Chicago, IL
MS in Applied Data Science Sept 2025 – Dec 2026

Relevant Coursework: Machine Learning, Time Series Forecasting, Big Data & Cloud Computing, Statistical Models, Quantitative Finance

Virginia Tech Blacksburg, VA
BS in Computer Science & Computational Modeling and Data Analytics Aug 2020 – Dec 2024

EXPERIENCE

University of Chicago Medicine Chicago, IL
Graduate Research Assistant – Biomedical Data Science Sept 2025 – Present

- Build scalable Python pipelines to process 100k+ single-cell spatial proteomics profiles on HPC infrastructure, performing preprocessing, dimensionality reduction, and clustering
- Optimize and benchmark PCA and clustering configurations to evaluate stability, runtime tradeoffs, and reproducibility across large datasets
- Generate analytical visualizations and summary reports to support data-driven research decisions

Chicago Education Advocacy Cooperative Chicago, IL
Data Analyst Mar 2025 – Jul 2025

- Cleaned and standardized educational survey datasets using Python (Pandas), handling missing values, inconsistent categorical labels, and duplicate records to produce analysis-ready tables
- Developed reusable transformation scripts to convert raw CSV exports into structured datasets and prepared aggregated metrics for internal Power BI reporting

Berkley Alternative Markets Tech Blacksburg, VA
Software Engineering Intern Jun 2024 – Dec 2024

- Automated 15+ validation workflows to ensure data integrity across insurance claim and payment systems, improving reliability of production releases
- Developed K6 API test scripts to validate multiple GraphQL endpoints, ensuring response fields conformed to defined schema contracts

Cypress Creek Energy Chicago, IL
Quantitative Development Intern Incoming Summer 2026

- Role focused on revenue analytics, data pipelines, and dashboard development for utility-scale solar and storage projects

PROJECTS

HERE Technologies - HD Map Feature Extraction Jan 2026 – Present

- Building an end-to-end AI pipeline fusing street-level imagery with satellite tiles and OpenStreetMap to automate HD map feature extraction
- Extended MapTR with a satellite fusion block for automated road feature extraction, targeting mAP >55%

Crash Rate Prediction from Traffic Volume Data Sep 2024 – Dec 2024

- Built a machine learning pipeline to predict roadway crash rates from traffic volume inputs, performing feature engineering and TensorFlow model training
- Deployed the model into a web application where authenticated users could upload data and generate predictions through an interactive interface

Certificates / Achievements

- **Amazon:** AWS Solutions Architect – Associate, AWS Certified Cloud Practitioner, AWS Certified AI Practitioner
- **Microsoft:** Microsoft Azure Data Fundamentals
- **Hackathons:** Grand Champion- VT CMDA Data Competition, Yale Hackathon(YHacks), Northwestern Hackathon

SKILLS

Languages	Python, SQL, Java, JavaScript, R, C, DAX(Data Analysis Expressions)
Tools & Frameworks	PyTorch, NumPy, Pandas, Scikit-Learn, XGBoost, PySpark, Spark, Matplotlib, GraphQL, Hive
Software & Cloud	AWS, Azure, Google Cloud, Docker, Git, Power BI, Tableau, Excel
Product & Collaboration	Stakeholder Engagement, KPI Definition, A/B Testing, Design Thinking, Agile
Modeling & Analytics	Clustering, Regression modeling, Time-series forecasting, Statistical inference
